

ANDREW PETERS

Augusta, GA • (706) 414-9830 • apeters4072@gmail.com

Professional GIS Portfolio: <https://apeters4072.github.io/apeters.github.io/index.html>

PROFESSIONAL SUMMARY

U.S. Marine Corps veteran with over 5 years of experience in Geospatial Intelligence (GEOINT) with a varied background, consisting of imagery exploitation, terrain modeling and analysis, and artificial intelligence (AI). Completed highly critical and timely assessments that enabled organizational success in dynamic and fast-paced environments. Skilled in multidiscipline integration in both analytical and dynamic targeting workflows. Experienced in multinational and joint collaboration through facilitation of intelligence production and dissemination across several classified domains. Proven leadership through challenging circumstances by leveraging concise communication and excellent interpersonal skills.

SKILLS

TS/SCI Security Clearance	SocetGXP	Analytical
Maven Smart System	RemoteView	Critical Thinking
ArcGIS Pro	iSpy	Project Research
ArcGIS Online	Fade MIST	Interagency Coordination
ENVI	MIDB / MARS	Briefing Skills

WORK EXPERIENCE

Imagery Analyst

August 2026 – Current

CACI | 513th MIB | Fort Gordon, GA

- Reported structured analysis and observations of adversary units, equipment, and activity to national reporting databases; contributing greater situational awareness to the 513th MIB mission and to the broader Intelligence Community (IC).
- Utilized multi-source intelligence reporting to expand the scope of GEOINT analysis and reporting, strengthening analytical assessments and facilitating discovery of enemy activity.
- Collaborated with peers to streamline data extraction methods, improving analyst efficiency when conducting Structured Observation Management (SOM) and unifying reporting schemas.

Geospatial Analyst

June 2026 – August 2026

Actalent / B&A | Remote

- Extracted topographic features from commercial satellite imagery to contribute to the National Geospatial-Intelligence Agency's (NGA) Topographic Data Store (TDS) geospatial dataset.

WORK EXPERIENCE (CONTINUED)

Geospatial / Imagery Intelligence Analyst

June 2021 – May 2026

United States Marine Corps | 2d MAW | Cherry Point, NC

- Developed and enhanced organizational capacity to conduct algorithmic warfare by shortening targeting workflows by 83%, primarily by implementing artificial intelligence (AI) models – such as computer vision and predictive modeling – into sensor-to-shooter workflows.
- Researched and assessed emerging partner and adversarial tactics through exploitation of classified and commercial satellite imagery, strengthened by fusing multi-source reporting to increase confidence for intelligence reporting. The results of the analysis were communicated through over 15 briefings to senior executive staff with the intention of improving organizational techniques, yielding increased survivability against near-peer adversaries.
- Spearheaded modernization efforts within the geospatial intelligence team to increase production capability by over 60% by implementing new data structures and methods of storing information. Furthermore, established a new standard for production dissemination, enabling organizations with limited intelligence capabilities to obtain timely and relevant GEOINT data.

EDUCATION AND CERTIFICATIONS

Bachelor of Science in Geospatial Intelligence and Analysis

Est. Grad. Spring 2028

Delta State University | Cleveland, MS

- Completed 63 credit hours of study while maintaining a 4.0 GPA.
- Learned how to apply GEOINT to problem sets beyond the scope of military objectives, such as disaster management, critical infrastructure protection, and government administration.
- Developed a coding skillset, based in Python and R, in facilitate data analytics and automation of GIS processes.
- Received formal education on airborne and space-based active and passive geospatial sensors.

GEOINT Professional Certification Geospatial Analysis (GPC GA-II)

Jan 2026 – Aug 2027

National Geospatial-Intelligence Agency (NGA)

GEOINT Professional Certification Imagery Analysis (GPC IA-II)

Dec 2024 – Aug 2027

National Geospatial-Intelligence Agency (NGA)

GEOINT Professional Certification Fundamentals (GPC-F)

May 2024 – Aug 2027

National Geospatial-Intelligence Agency (NGA)

Certified GEOINT Professional – Essentials (CGP-E)

Oct 2023 – Oct 2024

United States Geological Survey (USGS)
